

Bright Green Nature Microfund for families and individuals

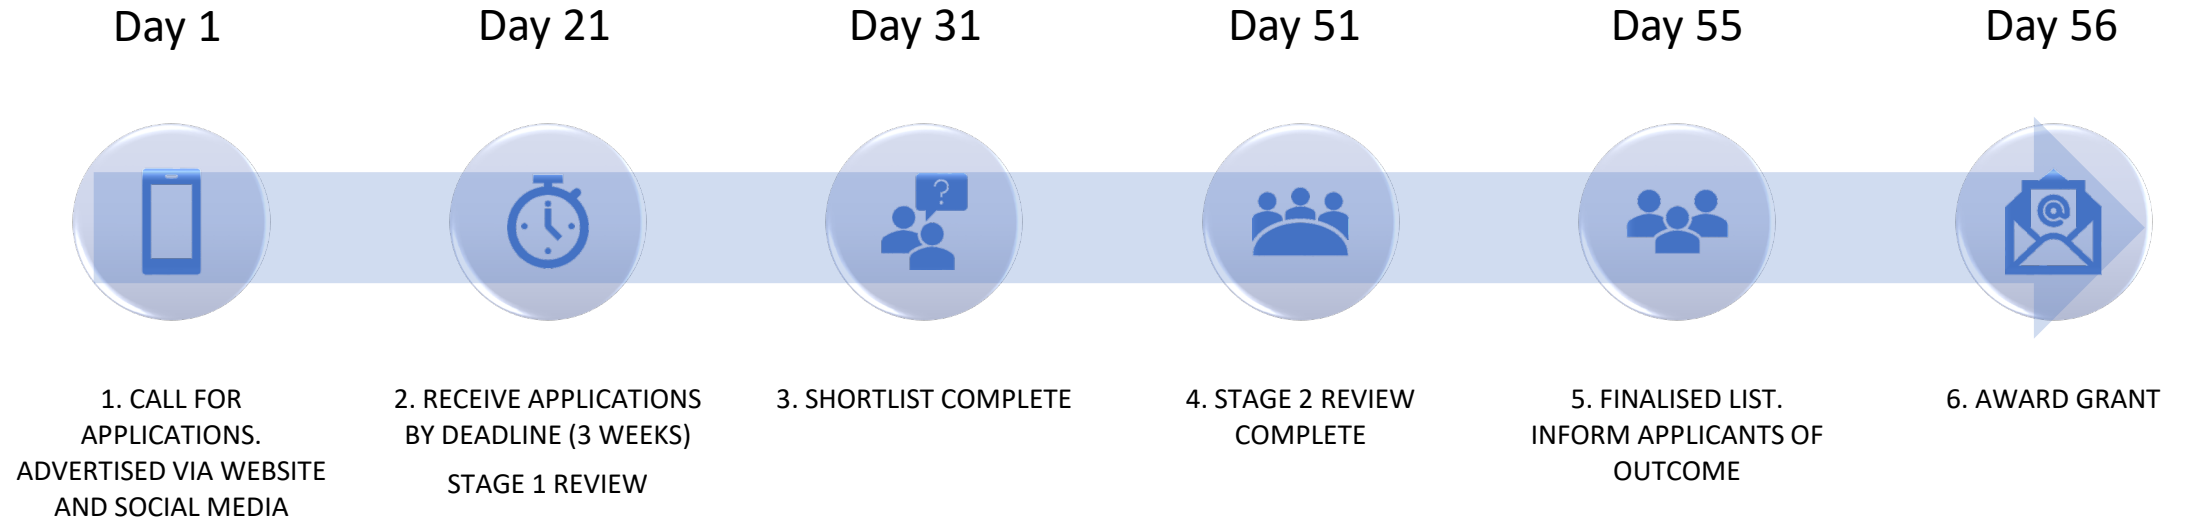

WILD YOUR SPACE!

Grants of up to £350 for families and individuals
to encourage wildlife into their space.

Proposed review process

Two
month
cycle

Example 1

- Lily wants to build a small pond in her garden. She would like to use existing materials as far as possible, including an old bath tub which she plans to sink into the ground. However she requires some financial support to purchase native plants, as well as rocks and clay to build up the sides of the bath to make it suitable for wildlife.

Example 2

Jamie would like to improve the number of pollinators in his garden, such as butterflies and bees. He would like to do this by allocating a large part of his lawn for a mini meadow, planting yellow rattle plug plants to weaken the grass and managing the mowing regime.

He also has an unplanted area where he would like to sow wildflower seeds.

Jamie would like financial assistance to purchase the plug plants and seeds to start his project.
